

There's Always an Alternative

A range of **office & writing products** designed to be kinder to our planet

Making the switch to becoming an environmentally responsible brand is about more than using trendy eco wording, it's about making long-term, sustainable goals.

It's important to understand what these terms really mean so that your brand can position itself authentically.

You will find these roundels on each page so you can quickly identify the product's eco credentials.

Please note:

Wherever you see the Geiger logo on a product is one of the many places you can print your logo.

Please contact us to find out all the branding possibilities on any of the products featured in this catalogue.

Products that can be used repeatedly. Use over disposable products to reduce the amount of waste and help sustain the environment for future generations.

A biodegradable product has the ability to break down, safely and relatively quickly by biological means, into the raw materials of nature and disappear into the environment.

Fairtrade changes the way trade works through better prices, decent working conditions and a fairer deal for farmers and workers in developing countries.

Recyclable materials are made of raw materials that can be reprocessed and used again. Such materials include glass, paper, metal, and limited types of plastic.

Organic materials do not rely on synthetic pesticides, herbicides and fertilizers that can deplete the soil of valuable nutrients and increase environmental degradation.

Recycling is the process of collecting and processing materials that would otherwise be thrown away as trash and turning them into new products. Recycling prevents and reduces the consumption of fresh raw materials.

Ethical materials products are manufactured without using process material, person or animal in an unethical or immoral way.

Renewable materials are great for the environment as the natural resource can replenish itself generation after generation.

Social enterprises are businesses that put the interests of people and planet ahead of shareholder gain. These businesses are driven by a social/environmental mission and reinvest profits into creating positive social change.

Working with sector partners, we lead the way in formalising an agreed definition of what constitutes genuine social enterprise, the essence of which has since been adopted in several other countries.

Bamboo is a wildly abundant and renewable resource. It is 100% naturally grown and is the fastest growing plant on earth! It requires no pesticides and is 100% biodegradable.

Bamboo Tablet Holder

Tablet holder made from bamboo that fits almost all tablets and mobile phones. The viewing angle can be adjusted, making it the perfect accessory while working.

Bamboo Foldable Desk

Foldable and adjustable desk made from bamboo. This versatile desk allows for adjusting the height but also the angle for reading books, working on a laptop, watching movies on a tablet, or to enjoy a nice meal. The fixed side table is suitable for a cup, computer mouse and/or notebook.

Bamboo Phone Holder

Versatile mobile phone holder made from bamboo that fits almost all phone models. Due to the clever construction the phone can be positioned in both portrait and landscape mode. Extra features are cooling vents on the back panel and a charging cable that easily can be hidden, not to interfere with the usage.

Bamboo Desk Light & Wireless Charger

Foldable Bamboo desk lamp with 48 LED lights and 10W wireless charging and 2 USB hub.

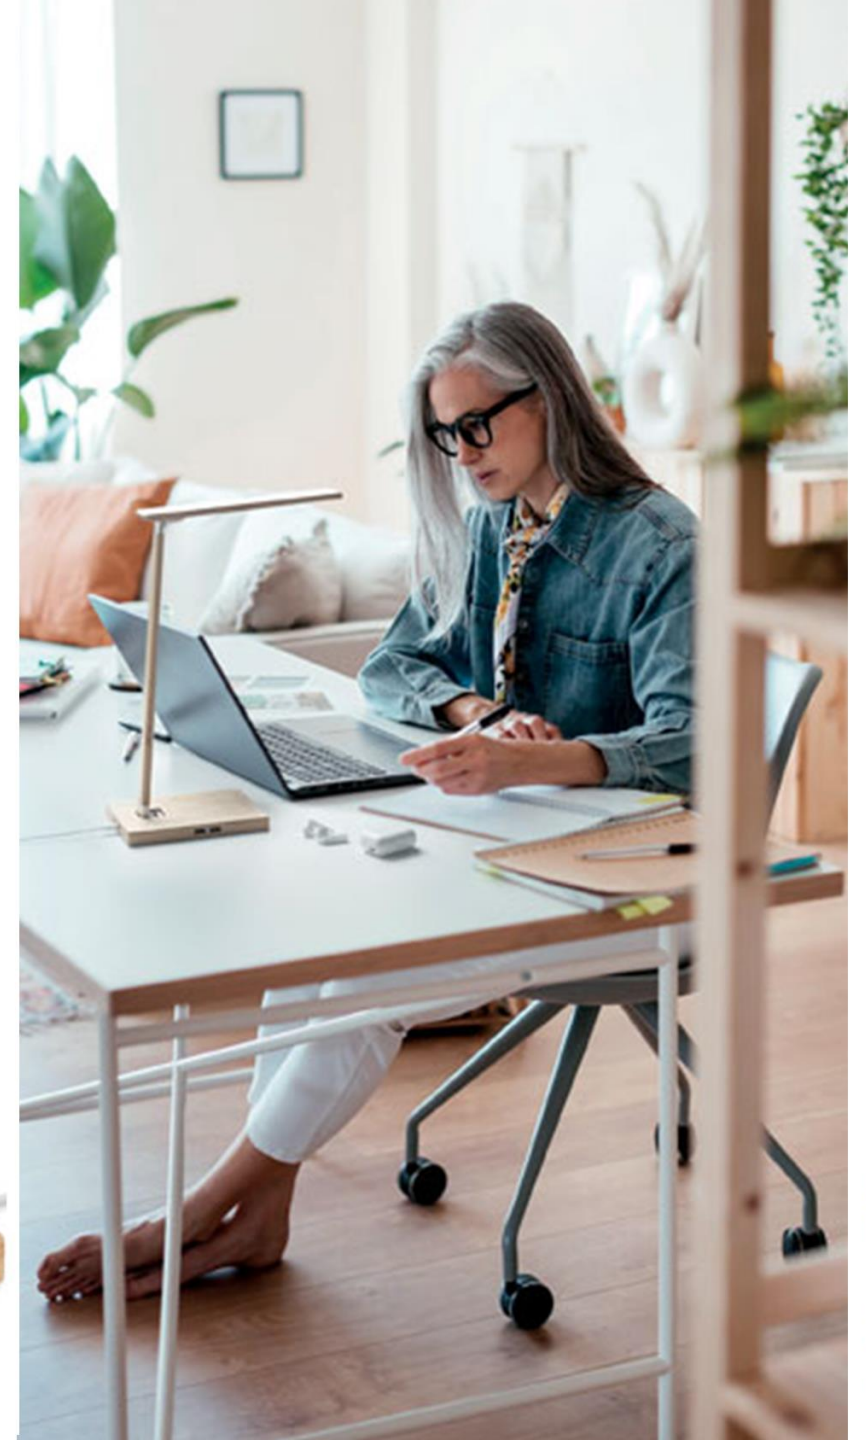

Bamboo Desk Organizer & Wireless Charger

Bamboo desk organizer and pen holder with 10W wireless charging phone stand.

Bamboo Desk Organizer & Wireless Charger

Desk storage desk organizer in bamboo with wireless charger.

Prodir Shell Ballpens

Enriched by the sea.

Body, cap and nose cone of the special-edition model DS5 Shell Metal Clip are made from plastic enriched with 30% recycled used seashells - for example oyster shells from French gourmet restaurants - the remaining 70% come from plastic, half of which has been recycled or regenerated from internal waste.

Every year, it is estimated that more than 7 million tons of seashells are thrown away by the seafood industry. The shells are extremely slow to break down, are expensive to dispose of and can harm the environment.

Bambook

The Bambook is a reusable smart notebook with a free app that allows you to digitize all your notes.

We're on a mission to stop deforestation due to single use paper. To make your contribution to the planet even bigger, we also plant a tree, at the Bambook planting site in Madagascar, for every book that is purchased.

For each product sold, we plant a tree in Madagascar in collaboration with Eden Projects. With our reforestation project we contribute to the restoration of Madagascar's ecosystem and create employment opportunities for the local communities.

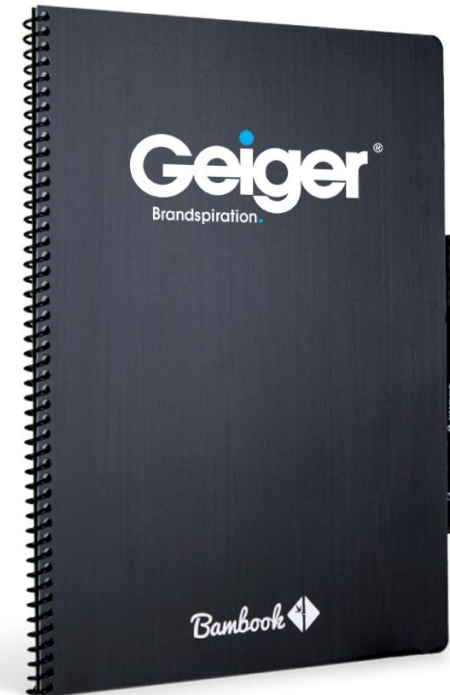

Bambook is produced locally by hand at a sheltered workshop in Ede, the Netherlands. Your book is put together with love and care by people who are disadvantaged from entering the labour market. By purchasing a Bambook you are creating employment opportunities for even more people! All books are also shipped #as sustainably as possible in the least packaging required.

Hardcover Bambook

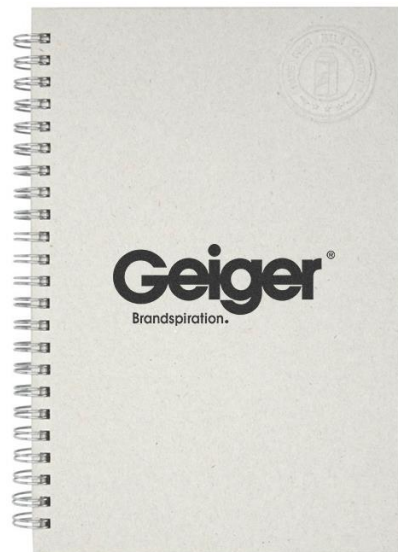

The hardcover Bambook notebook is made from a thick bamboo plate that is lightweight and equipped with an elastic band to keep your notebook well put together. This luxurious version is perfect if you're on the go a lot and is very durable. Available in A4 and A5 size.

Softcover Bambook

The softcover Bambook notebook is made of FSC certified cardboard. Printed with a subtle bamboo pattern on a black base, this is the classic edition which will surely catch the eye of your friends and colleagues. Available in A4 and A5 size.

Our Dairy stationery range made from recycled milk cartons (up to 70%). Used milk cartons are collected, sorted, processed and turned into paper, truly turning waste into something useful.

A5 Notebook

A5 Spineless Notebook

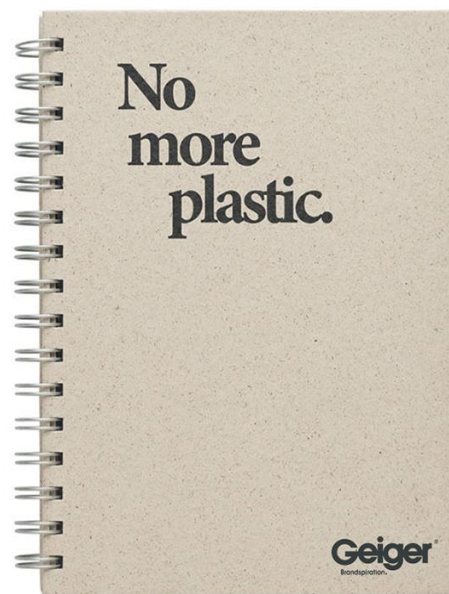

Memo Block

Our grass stationery set is made of 90 g/m² grass paper that contains up to 40% grass fibres and has a low environmental impact. Less water and energy are used in the production process compared to regular paper and no chemicals are used. All 3 items are made in Europe contributing to a lower carbon footprint.

3 Piece Grass Stationery Set

Stationery gift set consisting of an A5 size reference flexible 64 sheet notebook, a small stitched booklet (10 x 15 cm), and a memo bloc (8 x 11.5 cm).

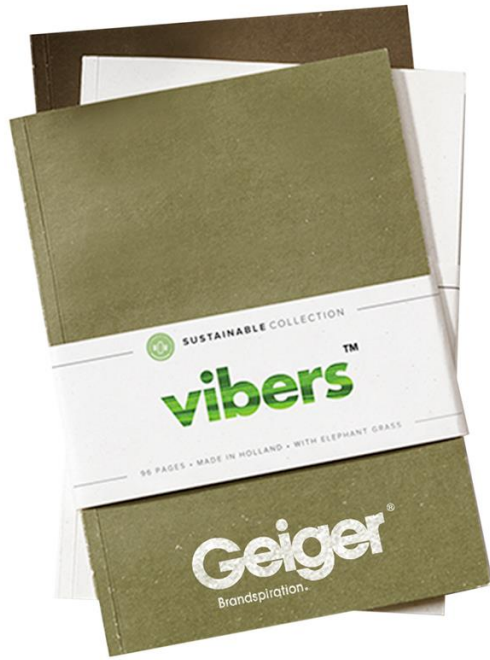

Grass Wiro Notebook

A5 notebook, 80 sheets of lined grass paper.

'Grow Me' Memo Block

Soft cover growing paper with memo block of 50 sticky grass paper sheets. When you have used all the 50 paper sheets, you can plant the memo block in the soil. A selection of wildflower meadow seeds will grow and give this item a new purpose.

Elephant Grass Notebook

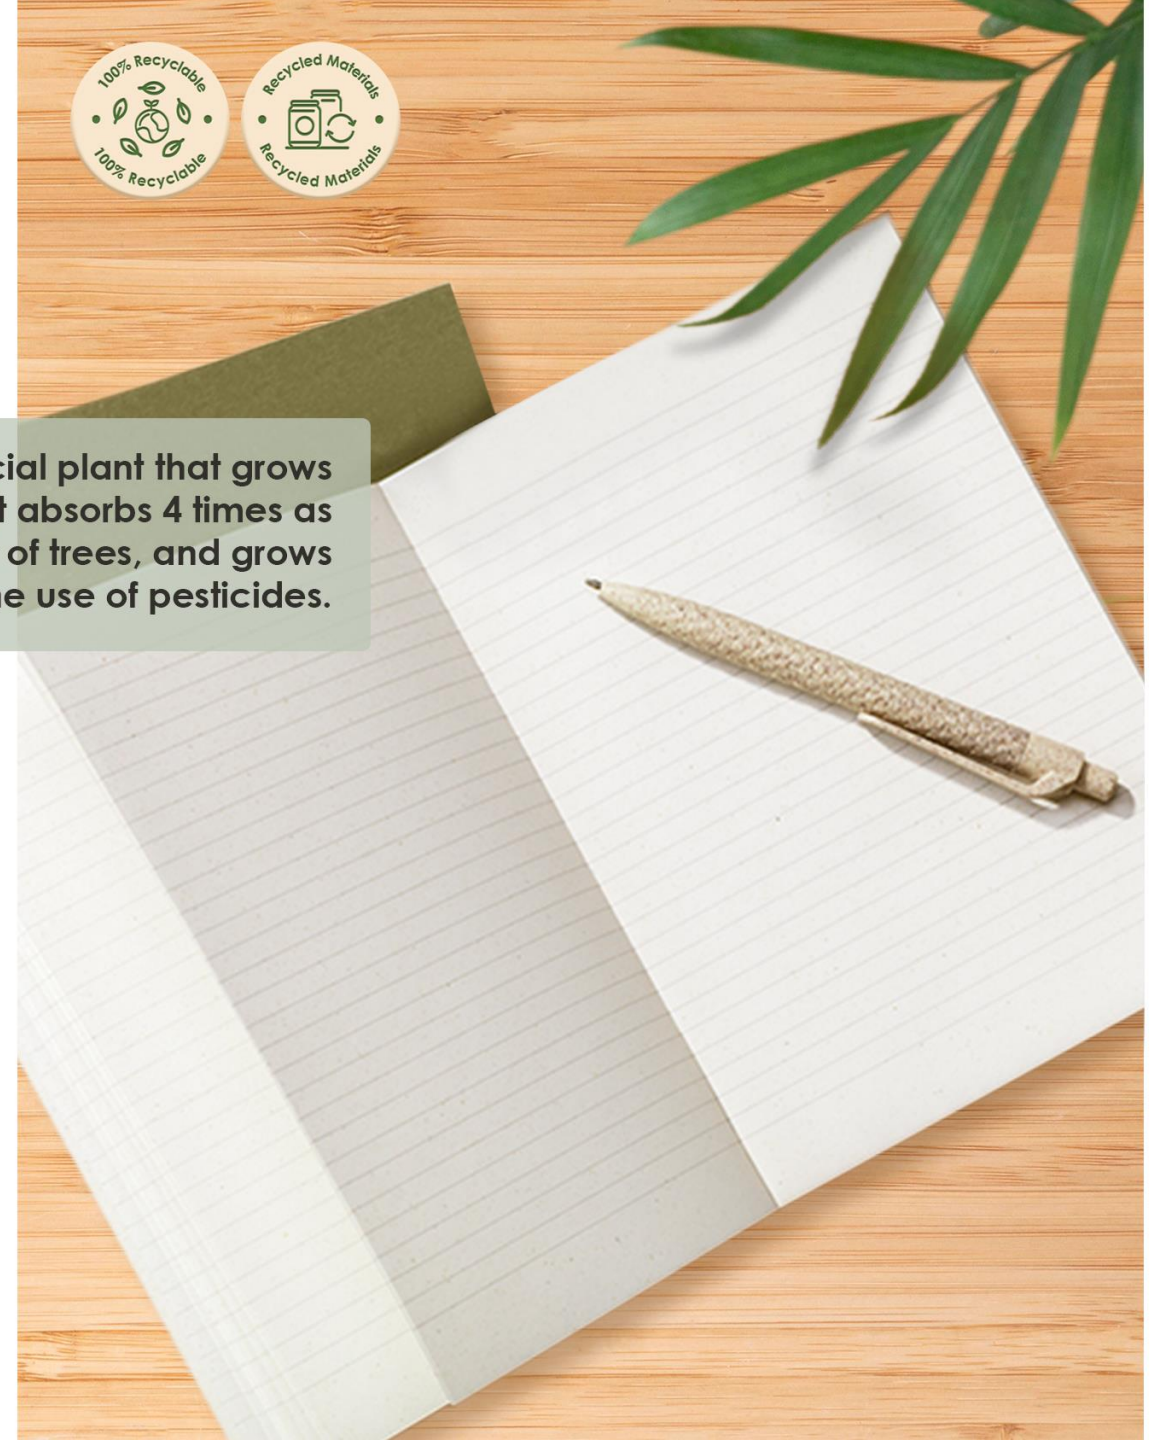

The paper inside this notebook is also made from Vibers, a fibre produced from elephant grass. This notebook is also created on Dutch soil – so we're making good use of the Dutch manufacturing industry while at the same time transporting the product as short a distance as possible.

Elephant grass is a special plant that grows in the Netherlands. It absorbs 4 times as much CO₂ as a forest of trees, and grows on poor soil without the use of pesticides.

Recycled Leather Notebook

A5 size reference notebook with cover made of leather leftover pieces. Features an elastic band, pen loop, ribbon marker and 80 sheets, 80 g/m² lined paper.

Trees for Cities

Trees for Cities is the only UK charity working at a national and international scale to improve lives by planting trees in cities.

For every 300 Kraft notebooks sold a donation is made so Trees for Cities can plant a tree.

The charity gets involved in local communities to cultivate lasting change in their neighbourhoods – whether it's revitalising forgotten spaces, creating healthier environments or getting people excited about growing, foraging and eating healthy food.

These A5 notebooks are made from recycled Kraft paper covers with an elastic closure, elastic pen loop and ribbon in various colours.

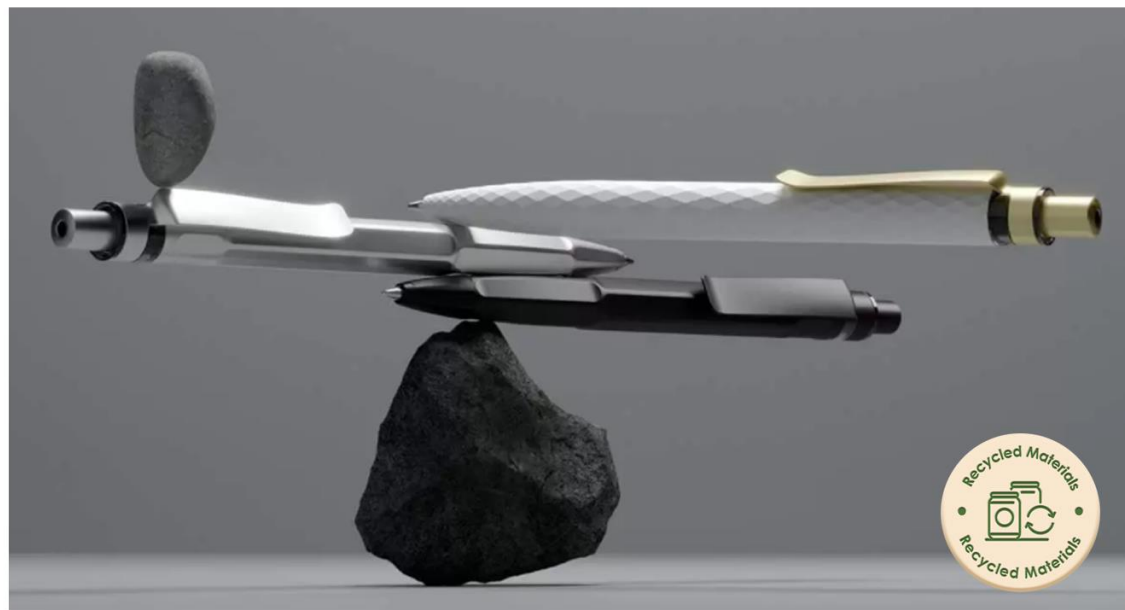

Prodir Stone Ballpens

The Prodir QS Stone pens are 60% less plastic and 50% more weight. It has a casing with three-dimensional design. Standard accessories such as elegant metal clips and matt varnished casing colours emphasise the high value perception.

**Karst A5 Hard Cover Notebook**

The smooth texture of the pages and flat-lay binding provide ample comfort and writing space for your notes and ideas. Features an elastic band to keep notebook shut, 144 waterproof, tear-resistant lined pages, an expandable back pocket for storage, and a divider ribbon with heat-sealed tip and rounded corners.

Stone is a natural product of the Earth, the original eco material. It does not require other materials or resources to create it yet it can be used to make a wide range of products. It's extremely durable, completely recyclable and even photodegradable!

Worldwide we produce around 50 billion kilograms of coffee grounds each year. 1 cup of coffee comes with an average waste of 7 grams. Organic residues, whether from coffee or even olives, used to mean a huge amount of waste until now!

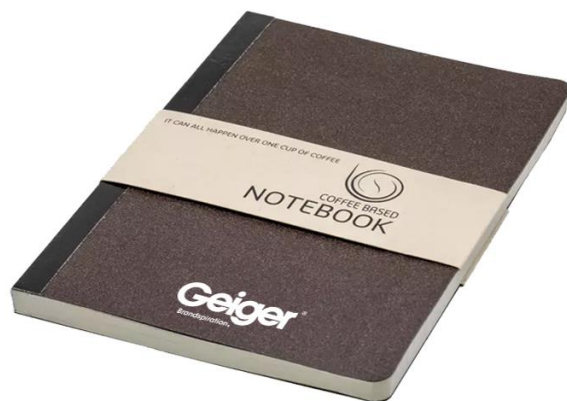

Coffee Husk Ballpen

Push button paper barrel ball pen with parts made of coffee husk.

Fabia Crush Notebook

Lightweight and flexible notebook for everyday notetaking. The cover is FSC certified and made from the residue of coffee (15%), olives (15%), and 40% post-consumer recycled waste. Features visible white singer stitching on the spine and includes 80 sheets, 70 g/m2 100% FSC white recycled lined paper. Made in Italy.

Coffee Waste Notebook

The cover of this notebook contains about 13 grams of coffee waste bonded with a biological starch from the potato processing industry. This notebook is made of the waste grounds of two cups of coffee! The paper is 100% recycled, meaning there's zero deforestation in its production process and it's as environmentally friendly as possible.

Bees are pollinators and play a critical role in healthy ecosystems, so are essential for our food production. To 'bee friendly' plant some flowers in your garden so bees have access to nectar from March to October. A tired bee would love a bit of sugar (never honey) so mix some water and white granulated sugar together then drip it onto a flower or leave on a plate to help revive a tired bee.

Sprout Pencil

Our custom-printed Sprout Pencils with Sleeve are a unique plantable pencil that's a great eco-friendly alternative to plastic promotional pens. Instead of an eraser at the end, each pencil contains a water-soluble seed capsule and comes complete with a full-colour printed sleeve. When it becomes too short to use, the pencil can be planted in soil and the seed will germinate and grow into a beautiful plant.

Choose from a wide choice of seed varieties including sunflower, daisy, carnation, forget me not, basil, thyme, sage, coriander and chia.

CorrectBook

The CorrectBook is a reusable notebook with an endless life!

250 million children unfortunately go to school every day without a pen or a piece of paper. As a result more than 750 million people worldwide of fifteen years and older are illiterate.

Every CorrectBook we sell enables us to provide one child in developing areas with a CorrectBook.

The erasable notebooks from Correctbook can be fully personalised. Choose your size, the type of cover, the cover print (inside and outside), and the inside (type of pages).

The Correctbook production takes place as locally as possible. This way, we can avoid the pollution of international transport and create local employment opportunities. Local production also ensures that we can make quick deliveries, and on a large scale. Of course, we produce our Correctbooks as sustainably as possible.

A Geiger pen with a black cap and a black body, featuring the 'Geiger' logo in black and blue. It is lying diagonally across a lined notebook with a brown cover.

Thank you.

Two cinnamon sticks with rough, light brown bark are positioned diagonally in the lower-left corner of the image.
